

AN-3232 Audio Distribution Amplifier

Features:

- Designed for military, intelligence, and professional applications
- 32 Channel buffer and distribution amplifier Audio Network
- Interface audio equipment to two DT321 A/D cards in a computer.
- Easy Connection to balanced or unbalanced equipment.
- Input DB-25 Connectors and inputs are high impedance
- Output connectors are high density 68 pin connectors.
- 1RU high 19" wide Rack Mount box

Audio Network (AN-3232) Specifications

Maximum Levels	
Input	4 Volts RMS at 1 KHz
Output	4 Volts RMS
Nominal Gain with an input of 1 kHz	±0.5 dB
Frequency Response relative to 1 kHz	20 Hz to 30 kHz
Power Input	15 Watts, 100 VAC to 240 VAC, 50 Hz tp 400 Hz.
